ENGINEERING SERVICES

EPC, PMC & COMMISSIONING

SERVICES PROFILE 2022

Prepared By ORSPL

ORGANIC RECYCLING SYSTEMS PVT. LTD

We have carefully developed our catalogue of services based on operational experience and data collected from our Solapur Project, a decade-long municipal solid waste management facility capable of processing waste on a very large scale.

Our services are also built based on experience in developing and assisting in a variety of waste management projects across the country, where each project came with its own set of operational and technical challenges that needed to be solved. We aim to use our subject matter expertise in waste management and processing acquired over the past decade to help upcoming project developers to efficiently construct and install viable waste processing plants, as well as provide maintenance support and engineering services.

Commissioning & Re-Commissioning services

Our commissioning services include commissioning of new anaerobic digesters and ensuring its successful startup.

In case the clients or project managers have an existing anaerobic digester or waste processing facility that needs repair, maintenance or needs to be made functional again, our re-commissioning services can help bring your plant back to its full functioning capacity.

Scope of work includes:

- Detailed status report with root cause analysis
- Estimation and costing
- OEM vendor management
- Testing & commissioning
- operational manual preparation and Supervision.
