Organic Recycling Systems Limited's Research & Innovation Centre Secures NABL Accreditation, Unlocking New Avenues in Testing, R&D and Technology Validation

Navi Mumbai, 11th Feb 2026, Organic Recycling Systems Limited (ORSL) announced that its Research & Innovation Centre (RIC) at MIDC Mahape, Navi Mumbai, ***has been accredited under ISO/IEC 17025:2017 by the National Accreditation Board for Testing and Calibration Laboratories (NABL)***, certifying the laboratory's technical competence in testing and calibration.

The accreditation enables ORSL to offer globally accepted, independent testing and validation services, significantly expanding the commercial and revenue-generating scope of its R&D infrastructure.

With this accreditation, ORSL's RIC is positioned to generate incremental and recurring revenues through:

- Third-party testing and certification.
- Technology validation and performance benchmarking.
- Sponsored research, pilot trials, and collaborative R&D with academic institutions and industry partners.

NABL-accredited laboratories play a critical role in ensuring data reliability, regulatory compliance, and performance assurance, particularly for large-scale waste management, compressed biogas, and renewable energy projects. ORSL's accredited RIC strengthens its ability to support stakeholders across the project lifecycle with credible and standardized testing outcomes.

Commenting on the development

Dr. Manju Tanwar, Chief scientist & Head – Research & Development, ORSL, added:

“This accreditation validates the scientific rigor, systems, and technical competence of our laboratory team. It allows us to expand from internal R&D into advanced testing, technology validation, and collaborative research for the wider industry. The RIC will now act as a knowledge and innovation hub supporting faster technology adoption, performance improvement, and regulatory compliance across the sector.”

About Organic Recycling Systems Limited (ORSL)

Organic Recycling Systems Limited (ORSL) is a pioneering environmental engineering company specializing in sustainable waste management and valorisation solutions. Established in 2008 by technocrats, ORSL develops and deploys robust, cost-effective, and eco-friendly technologies across the entire waste value chain.

ORSL operates India's first municipal solid waste (MSW) processing plant based on a patented anaerobic biomethanation process, recognized by the Government of India under the National Master Plan. One of its flagship projects is located in Solapur, Maharashtra, where biodegradable waste is converted into **Bio-Gas** and **fermented organic manure**, exemplifying a scalable circular economy model.

ORSL's research and innovation efforts are reinforced through collaborations with esteemed institutions such as IIT Bombay (IITB), IIT Kharagpur, IIT BHU, IIT Roorkee, AGH University Poland, University of Birmingham (UOB), and other technical partners. These partnerships continue to drive the company's intellectual property development and technological advancements in the environmental sector.
