Organic Recycling Systems Limited (ORSL) Expands Sustainability Services Portfolio through Strategic Collaboration in CBAM Advisory

Navi Mumbai, 5th May 2026

Organic Recycling Systems Limited (ORSL) has entered into a strategic business development and service collaboration with **General Carbon Advisory Services Private Limited** to strengthen its sustainability and carbon management service offerings, with a focused emphasis on **Carbon Border Adjustment Mechanism (CBAM)** advisory and compliance support.

This collaboration marks an important step in ORSL's continued evolution as a cleantech-driven organization, expanding beyond its established capabilities in **waste valorisation**, **bioenergy**, and **environmental engineering** into high-value sustainability advisory services.

Under this engagement, ORSL will leverage its strong industrial relationships, market presence, and sectoral understanding to identify and support organizations requiring CBAM preparedness, carbon reporting, emissions data management, and related sustainability compliance services. General Carbon Advisory Services will provide specialized technical

advisory, assessments, reporting frameworks, and verification support as part of the integrated service offering.

With global regulations such as CBAM increasingly impacting export-oriented industries, Indian manufacturers, particularly in sectors such as **steel, aluminum, cement, chemicals, and engineering products** are expected to face growing pressure to demonstrate transparent emissions reporting and compliance readiness.

Speaking on the development, **Yashas Bhand, Whole-time Director, ORSL** stated:

“As global markets move toward stricter carbon accountability frameworks, Indian industry requires practical and credible support to remain competitive. This collaboration strengthens ORSL’s ability to support clients with sustainability, carbon compliance, and decarbonisation advisory services while building long-term value-driven relationships.”

The collaboration will focus on delivering services including:

- CBAM readiness assessments
- Emissions data review and reporting support
- Carbon accounting and documentation frameworks
- Supplier engagement and sustainability reporting systems
- Verification and assurance coordination support
- Broader decarbonisation and climate compliance advisory

Speaking on the collaboration, **Priyanka Pothana, MD and CEO**, General Carbon Advisory Services Ltd. stated:

“With carbon regulations such as CBAM effectively translating emissions into direct financial liabilities, businesses need to approach carbon management with the same rigor as financial planning. Our collaboration with ORSL enables us to support organizations in not only meeting compliance requirements, but doing so through a structured, strategy-led approach. By integrating carbon data, financial impact assessment, and forward-looking decarbonisation strategies, we aim to help companies turn regulatory pressure into a strategic lever reducing tax exposure while building long-term competitiveness in a carbon-constrained global market”

This initiative aligns with ORSL’s broader vision of becoming a comprehensive cleantech and sustainability solutions provider, supporting industries in navigating the global transition toward low-carbon and climate-resilient business practices.

About Organic Recycling Systems Limited (ORSL)

Organic Recycling Systems Limited (ORSL) is a pioneering environmental engineering company specializing in sustainable waste management and valorisation solutions. Established in **2008** by technocrats, ORSL develops and deploys robust, cost-effective, and eco-friendly technologies across the entire waste value chain.

ORSL operates **India’s first municipal solid waste (MSW) processing plant** based on a patented **anaerobic biomethanation process, recognized by the Government of India under the National Master Plan**. One of its flagship projects is located in Solapur, Maharashtra, where biodegradable waste is converted into **Bio-Gas** and **fermented organic manure**, exemplifying a scalable circular economy model.

ORSL's research and innovation efforts are reinforced through collaborations with esteemed institutions such as **IIT Bombay (IITB)**, **AGH University Poland**, **University of Birmingham (UOB)**, and other technical partners. These partnerships continue to drive the company's intellectual property development and technological advancements in the environmental sector.

About General Carbon Advisory Services Private Limited

Established in **2009**, General Carbon Advisory Services Private Limited (GC Advisory) is a leading sustainability and carbon advisory firm with a strong track record of structuring carbon and climate finance transactions across India and Southeast Asia. The company offers a comprehensive suite of services spanning **ESG and sustainability, carbon markets, climate strategy, life cycle assessment**, and **energy advisory**, guiding organizations across compliance frameworks including **GRI, BRSR, IFRS, ESRS, CDP, TCFD and CBAM**.

Over its 15-year journey, GC Advisory has served over **250+ clients** across India, Southeast Asia, Africa, and the Middle East, and has been recognized as the Best Carbon Asset Management Company in Asia for two consecutive years, India's Greatest Brand in Consulting – Sustainability & ESG (2023), and one of the Top Corporate Sustainability Consultants by Industry Outlook (2024). With offices in Mumbai and Hyderabad and a team of 25 subject matter experts, GC Advisory is committed to driving measurable and lasting sustainability transformation for businesses worldwide.
